1. TYPE NUMBER AND DESCRIPTION

Type Number: CS0826-D-GSNFSWN-130

Description: 8 Characters X 2 Lines

LCD Panel: Gray STN, Positive, Transflective

Viewing angle: 6H

Operating Temperature: $0^{\circ}\text{C} - 50^{\circ}\text{C}$

Storage Temperature: $-10^{0}\text{C} - 60^{0}\text{C}$

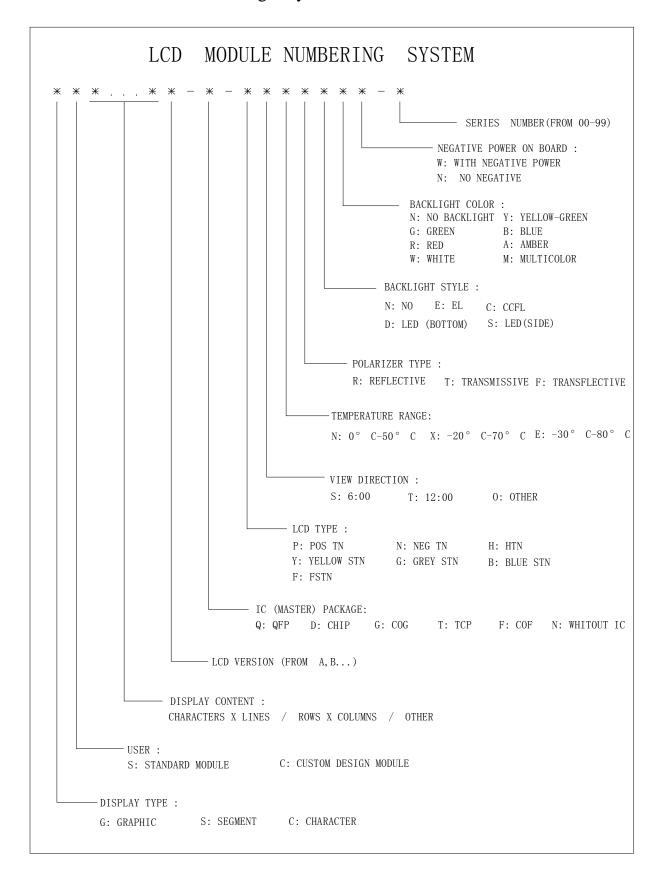

Backlight: Side, White LED

Controller: ST7066U-OA Or Equivalent

IC Package: Bonding

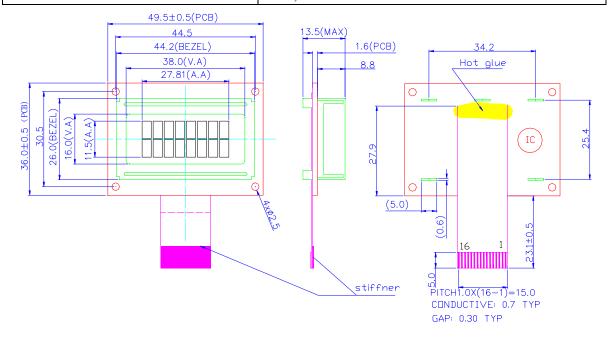

Logic Voltage: 5.0V

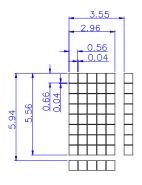

2. LCD Module Numbering System

3. MECHANICAL SPECIFICATIONS:

ITEM	STANDARD VALUE	UNIT
NUMBER OF CHARACTERS	8 CHARACTERS X 2 LINES	
CHARACTER FORMAT	5 X 8 DOTS	
MODULE DIMENSION	49.5(W) X 36.0(H) X 13.5(T)	mm
EFFECTTVE DISPLAY AREA	38.0(W) X 16.0(H)	mm
CHARACTER SIZE	2.96(W) X 5.56(H)	mm
CHARACTER PITCH	3.55(W) X 5.94(H)	mm
DOT SIZE	0.56(W) X 0.66(H)	mm
DOT PITCH	0.60(W) X 0.70(H)	mm
APPROX WEIGHT	TBD	g
LCD TYPE	Gray STN, Transflective	
DUTY AND BIAS	1/16 DUTY; 1/5 BIAS	
VIEWING DIRECTION	6:00	_
BACK LIGHT	Side, White LED	

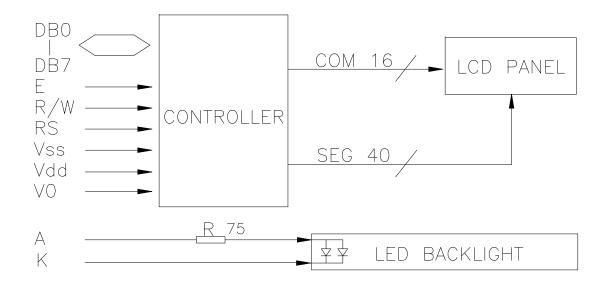

* Remark : General tolerance refers this model. (± 0.2 mm)

4. ELECTRICAL BLOCK DIAGRAM

4.1 PINS DEFINITION

PIN	SYMBOL	FUNCTION
1	Vss	Power Supply(GND)
2	Vdd	Power Supply(+5V)
3	Vo	Contrast Adjust
4	RS	Instruction/Data Register Select
5	R/W	Data Bus Line
6	Е	Enable Signal
7-14	DB0-DB7	Data Bus Line
15	A	Power Supply for LED+
16	K	Power Supply for LED-

4.2 ELECTRICAL BLOCK DIAGRAM

4.3 DISPLAY CHARACTER ADDRESS CODE

Display Position	1	2	3	4	5	6	7	8
DDDAMAII	00	01	02	03	04	05	06	07
DDRAM Address	40	41	42	43	44	45	46	47

5. ABSOLUTE MAXIMUM RATINGS

5.1 Electrical Maximum Ratings (Ta=25deg C)

ITEM	SYMBOL	CONDITION	MIN	MAX	UNIT
Supply Voltage (Logic)	Vdd – Vss	-	0	7.0	V
Supply Voltage (LCD Drive)	Vdd – V0	-	0	11.5	V
Input Voltage	Vi	-	-0.3	Vdd +0.3	V

5.2 Environmental Conditions

ITEM	SYMBOL	CONDITION	MIN	MAX	UNIT
Operating Temp	Topr	Dry	0	50	deg C
Storage Temp	Ttsg	Dry	-10	60	deg C

6. ELECTRICAL SPECIFICATIONS

6.1 Electrical Characteristics at Ta=25 deg C, Vdd = 5V + / - 5%

ITEM	SYMBOL	CONDITION	MIN	TYP	MAX	UNIT
Supply Voltage (logic)	Vdd-Vss	-	4.5	5	5.5	V
Supply Voltage (LCD)	Vdd-V0	Vdd = 5V	4.5	4.8	5.0	V
Input signal	V-ih	"H" level	0.7Vdd	-	Vdd	V
voltage (for E, DB0-7,R/W,RS)	V-il	"L" level	0	ı	0.6	V
Supply Current (logic)	Icc	-	0.9	1	1.2	mA
Supply Current (LCD)	Io	-	0.15	0.22	0.27	mA
Supply Voltage (LED)	V-led	-	2.8	3.1	3.4	V
Supply Current (LED)	I-led	-	-	30	50	mA

6.2 TIMING SPECIFICATIONS at Ta = 25 deg C, Vdd = 5V+/-10%, Vss =0V

6.2.1Write mode

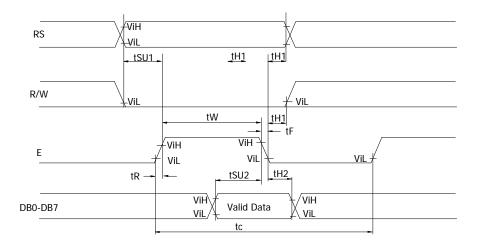

ITEM	SYMBOL	MIN	MAX	UNIT
E cycle time	tc	1200	-	ns
E rise time	tR	-	25	ns
E fall time	tF	-	25	ns
E-pulse width (H, L)	tw	140	-	ns
R/W and RS set-up time	tsul	40	1	ns
R/W and RS hold time	tH1	0	ı	ns
Data set-up time	tsu2	60	-	ns
Data hold time	tH2	10	-	ns

6.2.2 Read mode

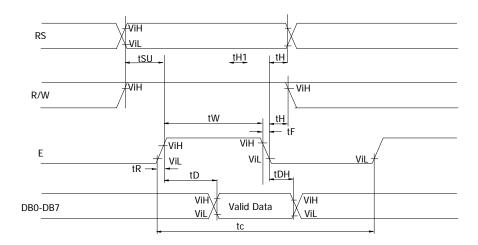

ITEM	SYMBOL	MIN	MAX	UNIT
E cycle time	tc	1200	-	ns
E rise time	tR	-	25	ns
E fall time	tF	-	25	ns
E-pulse width (H, L)	tw	140	-	ns
R/W and RS set-up time	tsu	40	-	ns
R/W and RS hold time	tH	10	-	ns
Data output delay	tD	_	120	ns
Data hold time	tDH	20	-	ns

7. POWER SUPPLY FOR LCD MODULE

Vdd-V0: LCD Driving Voltage

VR: 10K - 20K

8. ELECTRO-OPTICAL CHARACTERISTIC

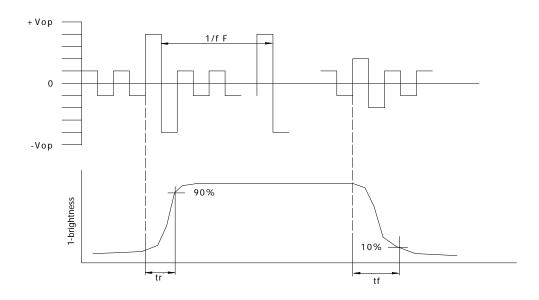

ITEM	SYMB OL	CONDI TION	MIN.	TYP.	MAX.	UNIT	REF.
Contrast	CR	25℃		12			Note1
Rise Time	tr	25℃		160	240	ms	Note2
Fall Time	tf	25℃		100	150	ms	note 2
Viewing Angle	θ1-θ2	25℃			60	DEG	Note 3
Viewing Angle	Ø1, Ø2	23 C	-40	-	40	DEG	Note 3
Frame Frequency	Ff	25℃		70		Hz	note 2

Note(1): Contrast ratio is defined under the following condition:

CR= <u>brightness of non-selected condition</u> brightness of <u>selected condition</u>

- (a). Temperature----25C
- (b). Frame Frequency-----64Hz
- (c). Viewing angle----- θ =0, Ø=0
- (d). Operating Voltage---4.8V

Note(2): definition of response time:

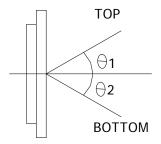

Condition:

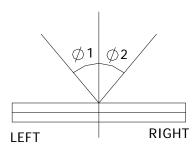

- (a). Temperature----25C
- (b). Frame Frequency-----64Hz
- (c). Viewing angle----- θ =0, Ø=0
- (d). Operating Voltage---4.8V

Note(3): definition of view angle:

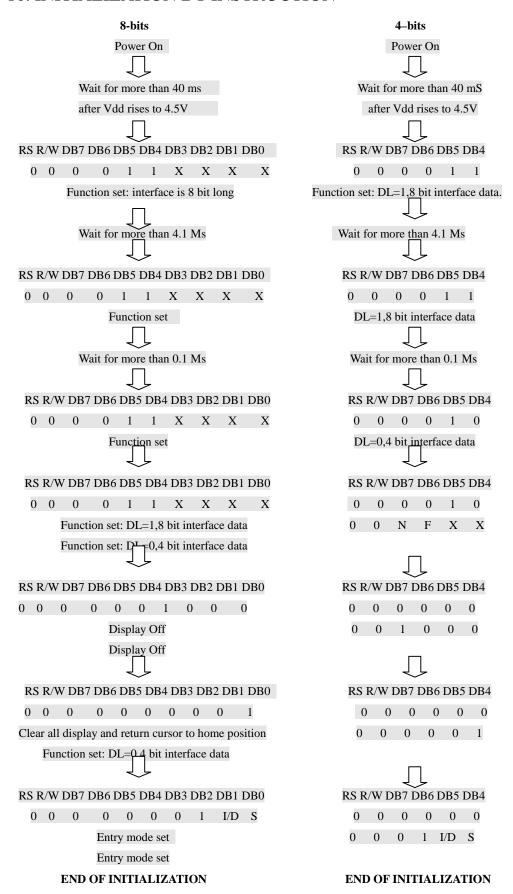

RIGHT-LEFT DIRECTION

10. INITIALIZATION BY INSTRUCTION

11. SOFTWARE EXAMPLES

8-BIT OPERATION 16 characters X 1 lines

Function	RS RW D7 D6 D5 D4 D3 D2 D1 D0	DESCRIPTION
Power on delay		Initialization. No display appears.
Function set	0 0 0 0 1 1 0 0 X X	Sets 8-bit operation, 2-line display and 5*7 dots character font.
Display OFF	0 0 0 0 0 1 0 0 0	Turn off display.
Display ON	0 0 0 0 0 1 1 1 0	Turn on display and cursor.
Entry Mode set	0 0 0 0 0 0 0 1 1 0	Set mode to increment the address by one and to shift the cursor to the right, at the time
		of write to the DD/CG RAM. Display is not shifted.
Write data to CG/DD RAM	1 0 0 1 0 0 1 1 1 1 0	Write "O". Cursor incremented by one and shift to right.
Write data to CG/DD RAM	1 0 0 1 0 1 0 0 1 0 <u>OR</u>	Write "R". Cursor incremented by one and shift to right
Write data to CG/DD RAM	ORIENT	Write "I" "E" "N" "T".
Set DDRAM address	0 0 1 1 0 0 0 0 0 0 ORIENT	Set RAM address so that the cursor is positioned at the 9 th position
Write data to CG/DD RAM	ORIENT DS	Write "D" "S".
Cursor or display shift	0 0 0 0 0 1 0 0 X X <u>ORIENT DS</u>	Shift only the cursor position to the left.
Write data to CG/DD RAM	ORIENT DIS	Write "I" "S"

4-bit operation (4-bits 1 line)

Function	RS	RW	/ D7	D6	D5	D4	Display	Description
power on delay								Initialization. No display appears.
Frnction set	0	0	0	0	1	0		Sets to 4 -bit operation. In this case, operation is handled as 8-bits by initialization, a nd Only this instruction completes with one write.
Frnction set	0	0	0	0	1 X	0 X		Sets 4 -bit operation, 1-line display and 5*7 dot character font. (number of display lines and character fontscannot be changed hence after.)
Display ON/OFF Control	0	0	0	0		0	_	Turn on display and cursor.
Entry Mode Set	0	0	0	0	0	0	_	Turn on display and cursor.
Write data to CG/DD/ARM	l	0	0 1	1	0	0		Write "O". Curaor incrementer by one and shift to right.
same as 8-bit operation								

12.Quality units

12.1 Purpose

This standard for quality assurance should define the quality of LCD module products to customer by EASTERNTIONIC LCD GROUP.

12.2 Scope

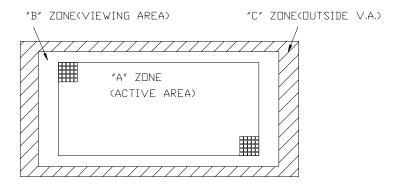

This document defines general provisions as well as inspection standards for LCD module supplied by EASTERNTIONIC LCD GROUP, except for those with special requirements from customer.

12.3 Definition

12.3.1 Definition of area

A Zone: Active area. B Zone: Viewing area

C Zone: Outside viewing area.

12.3.2 Definition of size

Large size(L): 1~6 pcs LCD screens are cut out of from each 14"×16" mother glass. Middle size(M): 7~50 pcs LCD screens are cut out of from each 14"×16" mother glass. Small size(S): more than 50 pcs LCD screens are cut out of from each 14"×16" mother glass.

12.4 Quality Specification

12.4.1 Conditions of Cosmetic Inspection

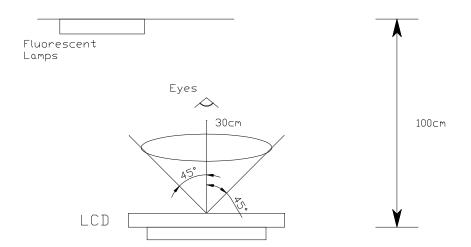

12.4.1 Test should be conducted under the following conditions:

Ambient temperature :22 \pm 5°C. Ambient humidity: 65 \pm 20%RH

Ambient Luminance: 40-watt fluorescent lamp.

An appearance test should be conducted by human sight at approximately 30 cm distance

from the LCD module under fluorescent light. Distance between LCD and fluorescent lamps should be 100 cm or more. Viewing direction for inspection is 45° from vertical against LCD.

12.4.1.2 When test the model of transmissive product must add the reflective plate.

12.4.2 Sampling plan

Unless otherwise agreed in writing, the sampling inspection shall be applied to the incoming inspection of customer.

- Lot size: Quantity of shipment lot per model
- Sampling type: Normal inspection, single sampling
- Sampling Level: Level II
- Sampling table: GB/T2828.1.1(GB-national standard of China)

12.4.3 Classification of defects and Acceptable quality level

Defects and classified as either a major or minor defect defined as bellows:

- Major defect: It is a defect that is likely to result in failure or to reduce materially the usability of the product for the intended function.
- Minor defect: It is a defect that will not result in functioning problem with deviation calssifiec.

The AQL for major and minor defects is defined as follows:

Partition	Definition	AQL
Major defect	Functional defective as product	0.4
Minor defect	Satisfy all functions as product but not satisfy cosmetic standard	1.0

12.4.4 Applicable instrument

- LCD module tester
 - Multimeter
 - Caliper
 - Defect size filming standard

12.4.5 Inspection quality criterion

12.4.5.1 LCD panel part

The inspection specification as following list:

Classify	Item	Description of defects	Inspection	on criterion	S	Drawing pecification
Major defect	1.Non-display	Product no function	Not	accept		
	2.LCD with wrong view direction`	Difference in Spec.	Not	accept		
	3.Segment missing	Part or all pattern do not light up	Not	accept		
	4.Occur high current	Current exceed designed value	Not	accept		
	5. LC leakage	LC does not fulfill the glass cell	Not accept			
	6.Deviation from drawing	LCM Dimension difference from drawing and over tolerance	According to dimensions noted in the specification			
	7.Wrong type applied	Wrong polarizer attachment	Not	accept		
		Pin attached wrong type applied	Not accept			
	8.Incorrect pins quality	Pin attached wrong quantity applied	Not accept			
Minor defect	9.Pattern deformation	Segment fatter or smaller	Dimension (mm) A≤0.1	Acceptable number Not count (Should not be connected to next dot)

Remark:

The minimum space between any 2 defects(spot,dirt) should more than 20mm, and max. allowed defect QTY in total:

Large size LCD: Zone $A \le 5/unit$, Zone $B \le 5/unit$; Middle size LCD: Zone $A \le 3/unit$, Zone $B \le 3/unit$; Small size LCD: Zone $A \le 2/unit$, Zone $B \le 2/unit$;

12.4.5.2 Other part

The inspection specification as following list:

NO.	Items	Criterion of defects	AQL
1	Backlight	 Lumination source flickers. Using spot, lines and contamination standard of LCD to judge the spots or scratches defect on backlight. 	Major Minor
		3. Not allow unlighted on backlight.	Major
		4. Colour and luminance of backlight should correspond its specification.	Major
2	PCB,COB	1.COB seal may not have pinholes larger than 0.2mm or contamination.	Minor
		2.COB seal surface may not have pinholes through to the IC.3. The height of COB should not exceed the height indicated in the assembly diagram.	Minor Major
		4. Beyond 2mm of the seal area, there may not have sealant on the PCB.	Minor
		5.No oxidation or contamination on PCB connector.	Minor
		6.Parts on PCB should correspond the characteristic, and not allow wrong parts, missing parts or additional parts.	Major
		7.The jumper on the PCB should correspond to the characteristic.	Minor
		8.The solder which gets on bezel,LED pad,zebra pad or screw hole pad should be smoothed down.	Major
		1. No unmelted solder pastes on the PCB.	Minor
3	Soldering	2. No cold solder joints, solder connection missing, oxidation of solder.	Minor
		3. No short circuits in components on PCB.	Minor
4	General Appearance	1. No oxidation, contamination, curves, cracks or bends on interface Pin of TCP.	Minor
		2. No solder residue or solder balls on product.	Minor
		3. The IC on TCP may not be damaged.	Major
		4. The residual rosin or tin oil of soldering(component or chip component) is not turned into brown or black colour.	Minor
		5. Packing method correspond the specification.	Major
		6. Dimension and structure correspond the specification sheet.	Major
		7. No dirt and break on the heat seal.	Major

12.5 Reliability

The LCD module shall not fail the following reliability test.

Item	Condition	Criterion	
High temperature operation	$+50^{\circ}\text{C} \pm 2^{\circ}\text{C}$, 8 ho		
Low temperature	$0^{\circ}C\pm2^{\circ}C$, 8 hour	s	1.Total current
operation			consumption
Humidity	Operation	$40 \degree \pm 2 \degree ,93\% \pm 2\%$ RH,8 hours	should be below double of initial
	Storage	$40 \degree C \pm 2 \degree C$, $93\% \pm 2\%$ RH, 24 hours	value. 2.Cosmetic defects should not be
High temperature storage	+60°C±2°C, 10 h	nours	happened
Low temperature storage	-10℃±2℃, 10 h	ours

	†	Face dropping E,F,G face: once	

Remark: The function test shall be conducted after 4 hours storage at the normal temperature and humidity after removed from the test chamber.

13. PRECAUTION FOR USING LCM

1. LIQUID CRYSTAL DISPLAY (LCD)

LCD is made up of glass, organic sealant, organic fluid, and polymer based polarizers. The following precautions should be taken when handing,

- (1). Keep the temperature within range of use and storage. Excessive temperature and humidity could cause polarization degredation, polarizer peel off or bubble.
- (2). Do not contact the exposed polarizers with anything harder than an HB pencil lead. To clean dust off the display surface. Wipe gently with cotton. Chamois or other soft material soaked in petroleum benzin.
- (3). Wipe off saliva or water drops immediately. Contact with water over a long period of time may cause polarizer deformation or color fading, while an active LCD with water condensation on its surface will cause corrosion of ITO electrodes.
- (4). Glass can be easily chipped or cracked from rough handing. especially at corners and edges.
- (5). Do not drive LCD with DC voltage.

2. Liquid Crystal Display Modules

2.1 Mechanical Considerations

LCM are assembled and adjusted with a high degree of precision. Avoid excessive shocks and do not make any alterations or modifications. The following should be noted.

- (1). Do not tamper in any way with the tabs on the tabs on the metal frame.
- (2). Do not modify the PCB by drilling extra holes, changing its outline, moving its components or modifying its pattem.
- (3). Do not touch the elastomer connector, especially insert an backlight panel (for example, EL).
- (4). When mounting a LCM make sure that the PCB is not under any tress such as bending or twisting. Elastomer contacts are very delicate and missing pixels could result from slight dislocation of any of the elements.
- (5). Avoid pressing on the metal bezel, otherwise the elastomer connector could be deformed and lose contact, resulting in missing piels.

2.2. Static Electricity

LCM contains CMOS LSI's and the same precaution for such devices should apply, namely

- (1). The operator should be grounded whenever he/she comes into contact with the module. Never touch any of the conductive parts such as the LSI pads, the copper leads on the PCB and the interface terminals with any parts of the human body.
- (2). The modules should be kept in antistatic bags or other containers resistant to static for storage.

- (3). Only properly grounded soldering irons should be used.
- (4). If an electric screwdriver is used, it should be well grounded and shielded from commutator sparks.
- (5). The normal static prevention measures should be observed for work clothes and working benches; for the latter conductive (rubber) mat is recommended.
- (6). Since dry air is inductive to statics, a relative humidity of 50-60% is recommended.
- 2.3. Soldering
- (1). Solder only to the I/O terminals.
- (2). Use only soldering irons with proper grounding and no leakage.
- (3). Soldering temperature: 280 $^{\circ}\text{C} \pm 10^{\circ}\text{C}$
- (4). Soldering time: 3 to 4 sec.
- (5). Use eutectic solder with resin flux fill.
- (6). If flux is used, the LCD surface should be covered to avoid flux spatters. Flux residue should be removed after wards.

2.4. Operation

- (1). The viewing angle can be adjusted by varying the LCD driving voltage V0.
- (2). Driving voltage should be kept within specified range; excess voltage shortens display life.
- (3). Response time increases with decrease in temperature.
- (4). Display may turn black or dark blue at temperatures above its operational range; this is (however not pressing on the viewing area) may cause the segments to appear "fractured".
- (5). Mechanical disturbance during operation (such as pressing on the viewing area) nay cause the segments to appear "fractured".

2.5. Storage

If any fluid leaks out of a damaged glass cell, wash off any human part that comes into contact with soap and water. Never swallow the fluid. The toxicity is extremely low but caution should be exercised at all the time.

2.6. Limited Warranty

Unless otherwise agreed between EASTERNTRONIC and customer, EASTERNTRONIC will repiace or repair any of its LCD and LC, which is found to be defective electrically and visually when inspected in accordance with EASTERNTRONIC acceptance standards, for a period on one year fron data of shipment. Confirmation of such date shall be based on freight documents. The warranty liability of EASTERNTRONIC is limited to repair and/or replacement on the terms set forth above. EASTERNTRONIC will not responsible for any subsequent or consequential events.

14. Declaration of conformity regarding the limitation of dangerous substances

深圳易事通液晶显示模块有限公司

SHENZHEN EASTERNTRONIC LCM CO., LTD.

4F, B3 Building, FuYuan Industrial Zone, FuYong Town,

BaoAn District, ShenZhen, P.R. China

DECLARATION OF CONFORMITY REGARDING THE LIMITATION OF DANGEROUS SUBSTANCES

WE, SHENZHEN EASTERNTRONIC LCM CO., LTD,

Declare that the product of CSO826-D-GSNFSWN-130 complies with: The directive 2002/95/EC Dated 2003/01/27 regarding the limitation of dangerous substances, in particular to clause 4 which forbids the use of the following elements:

- Lead
- Mercury
- Cadmium
- Hexavalant chromium
- •Polybrominated biphenyls
- Polybrominated diphenylethers

And to the annex which points out the exempted implementations \square To the directive 73/23/eec dated 1973/02/19 and the standard EN60335-1 regarding prohibition of following elements:

- Oils containing polychlorinated biphenyl
- Asbestos
- Radioactive substances

Name: Ding zhenhua

SHENZHEN EASTERNTRONIC LCM CO., LTD.

Issued on Nov 28, 2008

According with the proposal of Technical Adaption Committee (TAC) of a limit of 0.1% by weight for lead hexavalent chromium, mercury, PBBs and PBDRs and 0.01% by weight for Cadmium.
